At 08:23 AM 09/20/2001 -0500, it was written:  
>Problem: A friend asked me to  
>look at a Heathkit 401 transmitter.  
>  
>The thing is full of low-rent JAN rocks (ick).  
>They seem either inactive or yards off freq.

My experience with JAN crystals over the last umpteen years doesn't square with this opinion at all. Maybe I've been lucky? I dunno.

I do know that every JAN crystal I've bought, and it's a bunch, has been on frequency, reliable, and has come with its own characterization and test report.

Perhaps the Heath oscillator design is simply unduly hard on crystals????

73,

Jim - k4ccf

Subject: For Sale: Original BA Manuals and Goodies

Content-Type: text/plain; charset=us-ascii  
Content-Transfer-Encoding: 7bit

I have the following for sale. Click on the links to view pictures.

Shipping is extra on all

These are all original manuals- not copies!

Hallicrafters SX-115 Manual - excellent condition.....\$60

Hallicrafters HT-40K Halli-kit operating and service manual - excellent condition.....\$30

Heathkit HW-18-3 2 Channel SSB Transceiver Manual - excellent condition (no marks).....\$30  
(This is the 2 channel crystal controlled transceiver for 160 meters - I had one in the late 1960's)

Atlas 210X/215X Manual.....\$30

2 - Swan 350 manuals - covers have marks on them but insides are excellent condition.....\$30 each

Signal One Operating Manual - Original Signal One CX-7A Operating Manual. This manual contains the operating instructions for CX7A transceiver. This copy is clean and in excellent shape.....\$30

Hallicrafters CRX-2 High Band VHF FM Receiver.  
This is a 10 tube receiver that covers 152 to 174 MHz built in 1962 and 1963. Includes a built-in speaker. The unit works and is in nice condition with some scratches. If you are a Hallicrafters collector this would make a nice addition to your collection. ....\$45 + Shipping

<http://www.dancris.com/~n7rk/hallicrx2.jpg>

BUD Link Coupled Transmitter Coils

These coils cover 80-40-20 and 10 meters (their was no 15 meters than) and are either from the 1930's or 1940's. The set also includes the connector bar. Two of the coils have the ceramic bar cracked but can be glued back together. These would be ideal if you are building a 1930's or 1940's style transmitter in the several hundred watt power level.....\$50+ shipping

<http://www.dancris.com/~n7rk/budcoils.jpg>

#### Emerson Model 704 Portable Tube Radio

This is a four tube battery operated radio from 1952. The case has many scratches and the metal handle is rusty. The inside is clean and shows no signs of battery acid damage. The radio is untested as I don't have the high voltage batteries to test it. It may be hard to tell from the pictures but the color is a dark forest green.....\$20+ shipping

<http://www.dancris.com/~n7rk/emersonport.jpg>

#### "Rare" Gonset 2 Meter VFO and Audio Pre-Amp

This unit matches the Gonset Gooney Bird. I have been a ham for 38 years and I had never seen one of these units before. Cosmetically, the unit looks very good. I don't believe that the knobs are the original ones but it should not be that difficult to find the correct knobs off of a junker Gooney Bird. The unit is untested.....\$100+shipping

<http://www.dancris.com/~n7rk/gonsetvfo.jpg>

Drake R-4A Receiver and MS-4 Speaker with the original manual. The radio is in pristine condition and the speaker is also very clean. The copper chassis is also like new and unpitted. The radio plays however the audio is a bit distorted into the speaker but it sounds good into the headphones. All other functions work correctly. The receiver still has the factory tag on the line cord. The pictures do not do this receiver justice.....\$300+shipping

I understand, Herb.  
Believe me- I get "high behind" when people  
down-talk my military stuff ;-).  
But "economy" or not, there's no excuse for  
a product being made with such shoddy workmanship.  
The letters are just white smears you can barely recognize.  
It looks like someone tried to letter it with a white crayon.

I remember Lunchboxes; I built one.  
The panel lettering was crisp and the finish was clean.  
This panel is just sorry quality control or plain laziness.  
I'd have sent it back and demanded a decent one.  
I'm going to recommend he re-letter the thing.

Let's be clear here-  
I never said that Heathkits were "bad."  
I said \*this\* Heathkit panel is bad.  
And it is.

Yep, that black, slimy stuff. Available at any car parts store. But is it OK to use it on electro-mechanical stuff like motors, solenoids, etc.? Is it conductive? This lube ignoramus would like to know what you slippery folks think about molyube.

Have an excess SX-117 for sale. Decent Condition, one scratch on cabinet side panel, knobs good, front panel very nice - overall I'd say it's a 8.5. Works-\$250. plus shipping.  
Bob.

Content-Type: text/plain

#### More BA Miscellany For Sale

Heathkit GR-98 VHF Receiver. AC/DC portable designed to cover aircraft frequencies 108 - 135MC. Works well. Handle is missing. Vinyl covering is very good except for 1 mall tear next to front panel. Original. Unmodified. \$27

#### Literature

Aligning Philco Receivers by John F. Rider, Volume 1, 1937. Hardback in very good or excellent condition. \$11 PPD

RCA Receiving Tube Manual RC-16. 1950 version of the most famous tube handbook. Covers are good but some pages are loose toward the back of this copy. Very usable. \$9 PPD

RTTY Handbook by Wayne Green, 1st ed., 1974, Tab Books. Wayne's first, best effort. Binding has split on this copy. \$8 PPD

United Electronics Laboratories, An Introduction to Electronics, Radio, Television and RADAR, 1956. This is one of those booklet-based training courses. But this one has a unique format with oversize pages in a binder bound at the top instead of at the side. Some great photos, but this is mostly basic electronics. Nice shape in every respect. \$8 PPD

101 Ways to use your VOM and VTVM by Robert G. Middleton, Sams, paperback, 1964, good condition. \$11 PPD

Troubleshooting With The VOM and VTVM by Robert G. Middleton, Sams, paperback, 1962, good condition. Most of this is targeted at TV Servicing. \$7 PPD

E. F. Johnson Data Sheet 714 (sales brochure) for the 6N2 Thunderbolt Power Amplifier, 1959 I think. Crease in middle, darkening at edges. \$6 PPD

UTC Varimatch Transformers Terminal Arrangements for the CVM-series, 1952. Fragile but usable. \$5 PPD

UTC Varimatch Transformers Terminal Arrangements for the CVM-series, 1952. Same as above but has been scotch taped together. Free.

Home Made Radio Test Instruments, compiled By The Editors of Radio Craft, RadioCraft Library No. 25, 1941. Very good condition. Nicely written construction articles. 60+ pages. \$10 PPD

Triplet Model 2413 Tube Tester sales glossy, maybe 1946 vintage. Chipping at top edge and wrinkled elsewhere. Free.

Hickok Price List Effective January 15, 1940. Free

Heathkit GD-1A Grid Dip Meter original manual, 1948. Good condition with stain on front cover. \$8 PPD

Westinghouse Tube Substitution Guide, pocket-size, Undated but probably Early 1960s. \$3 PPD

FCC Rules and Regulations Part 95, for the Citizens Radio Service, April, 1976. Free.

GE Industrial Tubes Interchangeability List, 1961, good condition, useful for CRTs, transmitting tubes, 6000-series and special purpose types. \$8 PPD

PPD=Postage Paid By Me. Otherwise shipping is extra.  
Thanks.  
73, Don Merz, N3RHT

This is a dandy receiver for locating line noise because it's VHF-AM,  
not FM. I have 2 of them.

To All who send me e-mail:

I figured someone in these groups would have the info!

Many thanks to all who sent info on the  
Triad transformer! It looked more like  
a multi impedance output transformer to me.  
Maybe I can use it that way! 35ma. is a very  
puny rating, even for sand state stuff!  
73,  
Sandy W5TVW

Now that it is history, does anyone have a cassette recording of a old  
BBC World Service News broadcast? I do not have to have the complete news,  
though that would be welcome, but at a minimum the few bars of Lillyburlero  
(the signature tune) followed by the time pips, then a pause "This is  
London" (male announcer). Will gladly pay expenses. Thanks.

Bonjour to All  
A previous owner has replaced the 6H6Amperite ballast tube with an 6F6GT.  
Is it the proper substitute?  
Thought at first that a regular 6H6 would do the trick, was I wrong,  
microphonic ringing  
all over.

Andre

Content-Transfer-Encoding: 7bit

For all of those that live within driving range of Glendale Arizona drop  
by today. I am going to have the grand pre-opening event today.

still some signs to be done and some displays to have things added but we  
have enough done to finally show it off a bit! If you have anything to add  
please bring with....

address....

coury house / smecc  
5802 w palmaire ave  
Glendale AZ 85301

2 blocks north of Glendale ave, 2 blocks east of 59th ave  
In Glendale's historic Catlin Court District. There will be plenty of events  
going on in the area for the wife and kids too... crafts petting zoos etc  
etc...

thanks ed sharpe  archivist for smecc

Subject: Seeking Navy RBK-12 Manual  
Date: Sat, 22 Sep 2001 10:05:48 -0700  
MIME-Version: 1.0  
Content-Type: text/plain;  
        charset="iso-8859-1"  
Content-Transfer-Encoding: 7bit

Anchorites -

I'm trying to find a source for a Navy manual for the RBK-12 version of the  
Hallicrafters S-36A. This radio was also nomenclatured: CHL-46130-D.

>From the laminated schematic in the lid of the radio, I know that the RBK-12  
version has an added blanking input to the screen grid of the first RF  
stage, a panadapter output resistively decoupled from the mixer plate, and a  
different feedback configuration in the audio stages.

I get the impression that all of the RBK- series may have been  
Hallicrafters commercial receivers with perhaps minor modifications.

Any leads toward this kind of Navy documentation would be appreciated.

Thanks  
Chuck  N7RHU

Looking to update the list of owners of BC-474s.  
Please send name, call, email address and the  
serial number of your 474.

Thanks,  
Dave S.

Oh yes- and condition.  
Accessories have or want to trade,  
Parts needed, operational, etc.

Subject: For Sale: Original BA Manuals and Goodies  
Content-Type: text/plain; charset=us-ascii  
Content-Transfer-Encoding: 7bit

I have the following for sale. Shipping is extra on all

These are all original manuals- not copies!

Hallicrafters SX-115 Manual - excellent condition.....\$50

Hallicrafters HT-40K Halli-kit operating and service manual - excellent condition.....\$30

Heathkit HW-18-3 2 Channel SSB Transceiver Manual - excellent condition (no marks).....\$30  
(This is the 2 channel crystal controlled transceiver for 160 meters - I had one in the late 1960's)

Atlas 210X/215X Manual.....\$30

2 - Swan 350 manuals - covers have marks on them but insides are excellent condition.....\$30 each

BUD Link Coupled Transmitter Coils  
These coils cover 80-40-20 and 10 meters (their was no 15 meters than) and are either from the 1930's or 1940's. The set also includes the connector bar. Two of the coils have the ceramic bar cracked but can be glued back together. These would be ideal if you are building a 1930's or 1940's style transmitter in the several hundred watt power level.....\$50+ shipping

<http://www.dancris.com/~n7rk/budcoils.jpg>

Drake R-4A Receiver and MS-4 Speaker with the original manual. The radio is in pristine condition and the speaker is also very clean. The copper chassis is also like new and unpitted. The radio plays however the audio is a bit distorted into the speaker but it sounds good into the headphones. All other functions work correctly. The receiver still has the factory tag on the line cord. The pictures do not do this receiver justice.....\$300+shipping
